Professional Summary

Backend Developer with over 2 years of experience designing and developing ERP, HR, and warehouse systems using Laravel, CodeIgniter, and Django. Skilled in performance optimization, scalable system architecture, and search enhancement with Elasticsearch for fast data indexing and retrieval. Proven track record of reducing system response times by 30% and cutting attendance tracking errors by 40%. Strong collaborator experienced in API integration (WSO2) and delivering reliable, end-to-end backend solutions.

Technical Skills

- Languages & Frameworks: PHP (Laravel, CodeIgniter), Python (Django), JavaScript
- Databases: MySQL, PostgreSQL
- Tools: Git, GitHub, Jira
- Specialized: RESTful API Development, Third-Party API Integration (WSO2), Real
- Time Communication (Sockets), Database Optimization, System Architecture
- ERP Knowledge: Experience with ERP systems and working knowledge of ERPNext

Work Experience

Backend Developer – ATC Systematic Company (On-Site)
ERP System (Lumytic) (05/2024 – Present)

- Developed backend ERP modules (inventory, sales, production), improving workflow efficiency across departments.
- Built and integrated a **Pricing Module** to manage instance-based sales and subscription plans,
- Optimized database queries, improving system response times by 30%.
- Integrated third-party APIs using WSO2 for seamless communication.
- Implemented socket-based real-time updates across ERP modules.
- Collaborated with frontend and QA teams to ensure smooth integration.

Backend Developer – Code Shield Company (On-Site)
Human Resource Management System (02/2024 – 05/2024)

- Built a Laravel-based HRMS to manage employee records, attendance, and payroll.
- Integrated fingerprint devices, reducing attendance errors by 40%.

- Automated leave requests, overtime, and payroll processes.

Gym Management System (11/2023 – 01/2024)

- Independently developed a full-featured gym management system from database design to backend logic.
- Implemented QR code check-ins and real-time chat between coaches and players. Adopted by local gyms, improving client check-in speed and communication efficiency.

Freelance Backend Developer

Money Transfer System – Sultan Trading Company (10/2022 – 02/2023)

- Built a secure remittance management system using Laravel & MySQL.
- Implemented multi-branch account management and real-time fund tracking.

Warehouse Management System (03/2022 – 08/2022)

- Designed and developed a WMS with multi-user access control for improved security.
- Added billing, reporting, and inventory tracking modules, boosting efficiency and data accuracy.

Education

B.Sc. in Information Technology Engineering, Damascus University (2019 – 2024)

Soft Skills
- Strong Problem-Solving & Debugging
- Team Collaboration
- Adaptability & Work Under Pressure
